Expertise:

- Project / Product: discovery, strategy, spec, documentation, design, engineering, audit, roadmap - planning, backlog, tests, validation, delivery, agile ceremonies.
- APIs / microservices: API specification, data schemas & scenarios, prototyping, authentication & authorization, logs / telemetry, query sequencing, events orchestration, architecture / application logic modeling, platforms and gateway setting.
- LLM / GenAI integration: Data processing pipeline for RAG / knowledge apps. Prompt engineering. Chains or pipelines workflows. Tools or agents integration for actions.

Tools & teck stack:

- Design & Test API : Stoplight, SwaggerHub, Postman, OpenAPI
- API platforms / API gateway : Mulesoft, Kong, Gravitee
- CI/CD : Gitlab, Github, Docker
- Monitoring : Kibana & Datadog
- Database : SQL & NoSQL
- Documentation : Confluence, Mermaid.js, Readme, Figma, Excalidraw, Gitbook, Notion
- Projet : Jira, Redmine, Trello, Asana, Monday
- LLM: LLamaIndex, Langchain, Vercel AI, Pinecone, Groq, OpenAI
- JavaScript fullstack ecosystem & frameworks.

Work method & ethics:

- Reliability, autonomy, proactive attitude
- Seamless communication, transparency, reporting on tasks / results

EXPERIENCE

API & Middleware Project manager

Le Duff Group – nov. 2022 to dec. 2023 – full time – freelance

Goal: Close the delay in the migration from Mulesoft to a custom ESB solution (factory, restaurants, logistics, support functions, digital flows...) while respecting the deadline before license renewal. Absorb the increased activity linked to new projects, in particular the migration from SAP Hybris to SAP Commerce Cloud. Evolution of existing JOBS / APIs and creation of new enterprise services.

Tasks : Technical specs, documentation, audit, tests & validation, project management.

API Product Manager

Olympe.legal – june 2021 to sept. 2022 – full time – freelance

Goal: Prototype solutions for compliance of organizations in the use of personal data (GDPR). R&D mission with many challenges due to the innovative nature of the privacy tech (data compliance automation).

Tasks : Research, strategy, design, documentation, validation and project management.

Technical Project manager

Smart Tribune – april 2021 to may 2021 – full time – freelance

Goal: Provide integration for fifty applications (knowledge bases & white label chatbots) by contractors within two months deadline. Emergency project following a loss of data linked to the fire at the OVH data center.

Tasks : Backlog management, tech support, delivery monitoring, tests & validation.

Technical Project manager

Studio 76 – dec. 2020 to mar. 2021 – full time – freelance

Goal: Support the creation of new application development services based on the fullstack javascript ecosystem, with dynamic architectures, MACH or JAMSTACK.

Tasks : Stack & process implementation. Documentation. Project support.

JS fullstack Dev

fabienpamphile.com – sept. 2019 to nov. 2020 – freelance

Goal: Worked as a dev on javascript fullstack projects on front (Vanilla JS – React - Gatsby) or back (APIs Node & Express – Headless CMSs : Strapi & Sanity). DBs NoSQL.

Functional Project Manager

Getfluence – sept. 2018 to august 2019 – full time – freelance

Goal: Support the product team for the marketplace dev and create the customer success service with the implementation of CRM softwares & processes, in a context of strong growth. Meet customer needs for SEO expertise. Train employees.
